

## **SATCOM Earth Station Services**

TSS Solutions has decades of success in engineering, modernizing, installing, integrating, testing, and commissioning more than 1000 worldwide earth stations, antennas, and electronics. Our customers rely on these systems' timely, uninterrupted voice, video, and data.

- Antenna Size: VSAT—21M
- Frequency Bands: C/Ku/Ka/X/S
- Mounts: Full and limited motion
- Gateways & full Telemetry Tracking and Control (TT&C) Teleports
- DR-IBS/TDMA/SCPC/DAMA Networks
- IP/Frame Relay/ATM/ISDN Networks
- Point-to-Point/Mesh/Star Topologies
- Voice/Data/Video

The team at TSS is completely trained and highly experienced.

We can lead and manage your next SATCOM project. TSS can assist in planning & design, site preparation, installation, integration, testing, commissioning, traffic cut-overs, training and operations & maintenance.

Maintenance programs are available.

TSS will perform SSOG/ESOG or any space segment provider requirements.
