

TSS Solutions is a global leader providing mission-critical support, operations, and depot services for Radar and SATCOM systems. TSS offers innovative repairs, upgrades, modernization, and obsolescence engineering services. Our teams of experts are among the most highly experienced men and women in the industries we serve, and they bring uncommon passion and proven experience to our customers.

RADAR SOLUTIONS

TSS Solutions deploys state-of-the-art technology upgrades that enhance capabilities over those originally designed, rivaling the most modern radar systems available today. We deliver significant increases in operability and functionality of deployed radar systems that meet or exceed the capabilities of the newest radar systems available at 10% - 15% of the cost of buying new. Radar Leasing is available.

SATCOM SOLUTIONS

TSS Solutions has decades of success in engineering, modernizing, installing, integrating, testing, and commissioning more than 1,000 worldwide earth stations, antennas, and electronics for many of the most trusted operators worldwide

DEPOT REPAIR & UPGRADES

TSS Solutions offer unique solutions that bring legacy equipment up to current new system capabilities at significant cost savings compared to buying new ones. While modernizing the technology, user interaction remains virtually the same, eliminating the need for re-training when desired.
